COPYRIGHT TRANSFER/SUPPLEMENTAL MATERIAL LICENSE AGREEMENT

Mrs. Maria Soledad Caldirola
IMIPP-CONICET-GCBA
División Inmunología. Hospital de Niños Ricardo Gutiérrez
Buenos Aires
Argentina

July 3, 2020

JCM01717-20

Authors: Natalia Ferressini Gerpe, Agustina Moyano, Maria Caldirola, Elena DeMatteo, María Preciado, María Gaillard, and Paola Chabay (collectively the "Author")

Title: Characterization of NK cells present in pediatric tonsils in the context of asymptomatic EBV infection (the "Work")

In consideration of publication of the Work in Journal of Clinical Microbiology ("JCM"), the American Society for Microbiology ("ASM") requires that the Author transfer the copyright in the Work (including the text, figures, tables, artwork, abstracts, cover art, and errata) to ASM and license to ASM certain non-exclusive rights in the Supplemental Material. This permits ASM to publish the Work and facilitates broader exposure for the Work, given ASM's publishing expertise.

I. Copyright Transfer and Representations

Publisher's Agreement to Publish
ASM agrees to publish the above-referenced Work in consideration for this transfer to ASM of all copyright rights in and to the Work, subject to the provisions of this agreement. It is understood that the Author will receive no royalty or other monetary compensation. In the event that ASM decides not to publish the Work, this agreement shall be terminated and all rights revert to the Author.

Author's Agreement and Representations
The Author hereby assigns to ASM all right, title and interest under the Copyright Laws of the United States and all foreign countries in and to the above-referenced Work, for the duration of all terms of copyright and any renewals or extensions thereof. This assignment includes all derivative, republication, translation, electronic publishing and subsidiary rights of any nature, whether now known or hereafter developed. The Author reserves all proprietary rights other than copyright, such as patent or trademark rights, if any. If the Work was created within the scope of Author's employment and an Author's employer owns the copyright, this copyright transfer agreement must be signed by the Author and an authorized representative of the employer.

The Author submitting this form represents and warrants the following: a) the Work is original and the Work (including data) has not been previously published in print or online, e.g., in a journal, book, conference report, symposium proceedings, or company white paper; b) the Work will not contain matter that is libelous or injurious or in violation of any right of privacy or any copyright, patent, or other proprietary rights of any third party; c) to the extent any third party materials not in the public domain have been used, the Author has secured written permission from the copyright owner(s) to use those materials; d) the Work is not currently under consideration for publication elsewhere; e) the Author signing below has the full power and authority to enter this agreement on Author's own behalf and on behalf of any and all coauthors, and that he or she is a joint author of the Work or has been authorized by the copyright owner to enter into this agreement; and f) that all persons listed as Authors are aware of the submission to ASM and have approved the submission of the

Work, including all research presented therein, for publication by ASM.

If accepted for publication by JCM, Author agrees not to submit the Work elsewhere.

The Author agrees to indemnify, defend and hold harmless ASM, its officers, members, affiliates, successors and assigns, for any and all costs which arise out of any claim against ASM regarding any third party rights that ASM is alleged to violate if such alleged violation resulted from ASM's use of the Work or a breach by the Author of any representation or warranty contained in this agreement.

Rights Retained by the Author
ASM grants the Author and the employer for whom the Work was created (if applicable) a royalty-free, non-exclusive limited license to: a) post the Work (after publication by ASM) on the Author's personal or university-hosted website, provided that proper credit is given to the original ASM publication, but not on any corporate, government, or similar website without ASM's prior written permission; and b) republish discrete portions of this Work in any other publication (including print, CD-ROM, and other electronic formats) of which he or she is author or editor, provided that proper credit is given to the original ASM publication. Otherwise, neither the entire Work, nor significant portions thereof, may be republished in print, electronic or other form without ASM's prior written permission. For purposes of website posting, "proper credit" means either the copyright lines shown on the first page of the PDF version, or "Copyright © American Society for Microbiology, [insert journal name, volume number, page number, and year]" for the HTML version.

Special Notice Related to COVID-19 Global Pandemic
Coronavirus-related publications will be made available via the PMC Open Access Subset for unrestricted noncommercial re-use and secondary analysis in any form or by any means with acknowledgement of the original source. These permissions are granted for the duration of the World Health Organization (WHO) declaration of COVID-19 as a global pandemic.

Special Notice for U.S. Government Employees and Contractors
ASM understands that works authored solely by U.S. Government employees within the scope of their employment are not subject to U.S. copyright, and the transfer provision of this agreement only applies to any foreign copyright protection that may attach to the Work. If the Work was written pursuant to a U.S. Government contract under which the U.S. Government has publication rights, then the above transfer is made subject to those contract rights. All other provisions of this agreement apply to U.S. Government employees and contractors.

Special Notice for Grantee Authors
ASM allows National Institutes of Health (NIH) grantee and intramural Authors to provide a copy of the accepted **manuscript** to PubMed Central (PMC) for posting in the PMC Public Access Repository.

ASM also allows Authors whose work was supported by similar funding agencies that have public access requirements like that of NIH (e.g., the Wellcome Trust) to post their accepted **manuscripts** in publicly accessible electronic repositories maintained by those funding agencies. If a funding agency does not itself maintain such a site, then the Author may fulfill that requirement by depositing the **manuscript** in an appropriate institutional or subject-based open repository established by a government or noncommercial entity.

Since ASM makes the final, typeset articles from its primary-research journals available free of charge on the ASM Journals and PMC websites 6 months after final publication, ASM recommends that when submitting the accepted **manuscript** to PMC or a similar public access site, the Author specify that the **posting release date for the manuscript be no earlier than 6 months after the final publication of the typeset article by ASM.**

Select <u>one</u> of the following:

- ◉ I am an author of this Work, and I hereby transfer copyright as indicated above. I agree to all terms and conditions set forth in this agreement (also applicable for privately employed **and** U.S. Government authors of works prepared by **both** U.S. Government and non-government employees).
- ○ This Work was authored solely by U.S. Government employees within the scope of their employment and is not subject to U.S. copyright. I agree that the copyright transfer provision of this agreement only applies to any foreign copyright protection that may attach to the Work.
- ○ This Work was authored by NIH employees. A copy of the NIH Publishing Agreement and Manuscript Cover Sheet, modifying and superseding this document, will be supplied. All nonconflicting provisions in this document apply. *[Author: You will receive a PDF of this form by e-mail after you press "I Agree." Put the same identifying information (control number, title, etc.) on the NIH Form and e-mail the scanned form to cbrown@asmusa.org, upload it with your manuscript as a related file, or fax it to 202-942-9355.]*
- ○ The Work is subject to Crown Copyright. Author created the Work during the course of Author's employment with the Australian, Canadian, or UK Government. Copyright in the Work is owned by the Crown rather than the Author. The copyright transfer provision of this agreement does not apply, but in its place the Crown grants ASM a license to publish, distribute, reprint, and sublicense the Work in all forms and media.
- ○ This is a Work made for hire, and my employer owns the copyright. A copy of this form, signed by an authorized representative of my company, is supplied separately. I agree to all terms and conditions in this agreement other than copyright transfer.

Employer Name:

Signature (on behalf of employer):

Date:

If you are not submitting supplemental material for publication, scroll to the bottom, check the signature box, and press "I Agree." If you are submitting supplemental material for publication, read the following agreement, check the applicable box and the signature box, and press "I Agree."

II. SUPPLEMENTAL MATERIAL LICENSE AGREEMENT

Author's License and Representations

Author hereby grants ASM a non-exclusive, world-wide license to publish the Supplemental Material submitted in connection with the publication of the Work by ASM, electronically or in any other format or medium, in whole or in part, alone or as part of a collective or derivative work, and to authorize others to do the same.

Author represents and warrants that: 1) Author is the creator of, and sole owner of the copyright in, the Supplemental Material; or 2) Author is the co-creator of, and co-owner of the copyright in, the Supplemental Material and is authorized to enter into this Agreement; or 3) Author is otherwise authorized to use the Supplemental Material and to grant the rights conveyed in this Agreement. Author will provide to ASM signed, written permission, signed by the copyright

owner(s), for any Supplemental Material whose copyright is not owned by Author. Author further represents and warrants that none of the Supplemental Material has been, or will be, published in print or online prior to ASM's publication of the Article; and that use and publication of the Supplemental Material will not infringe or violate any third party's patent, copyright, trademark, privacy or other rights, nor will it cause physical injury or damage or endanger the safety or security of any reader or other person or entity. Author agrees to indemnify and hold ASM harmless from any damages, claims, liability or costs (including attorney's fees) caused by any violation of these representations and warranties.

Author's Acknowledgements
The Author understands and acknowledges that: 1) ASM will not edit the Supplemental Materials; and 2) the Supplemental Materials are not subject to modification after publication, although Author may use ASM's Errata and Author's Corrections to correct errors, pursuant to ASM's Instructions to Authors.

In the event that ASM decides not to publish the Supplemental Material, this License Agreement shall be terminated.

☑ **Checking this box serves as the Author's signature on and agreement with the supplemental material license agreement.**

☑ **Checking this box serves as the Author's signature on and agreement with the Copyright Transfer Agreement.**
